I am a motivated and driven IT student with an interest in development and cloud computing. I am a quick learner, and I am good at grasping new concepts which gives me an upper hand in adapting to new technologies. I hold certifications in Azure, reflecting my commitment to continuous learning and improvement in the field. I've created some projects in Web Development (ReactJS) and App Development(.NET) to get a closer look at how real-world projects are created. I aim to apply my knowledge and skills to contribute to projects and grow under the guidance of experienced professionals.

Certifications

- **DP-600 Fabric Analytics Engineer Associate**
- **AZ-104 Azure Administrator Associate**

- **DP-900 Azure Data Fundamentals**
- **AZ-900 Azure Fundamentals**
- **IT Essentials - Cisco**

Experience/Projects

NoteNest Note Taking Web App | ReactJS

Developed a ReactJS-based note-taking web application that allows users to create, update, and delete personal notes in a clean and intuitive interface. The project demonstrates the use of React hooks for state management and local storage for data persistence across sessions. Styled using modern CSS, the app showcases responsive design principles and dynamic UI updates. This project helped reinforce my understanding of ReactJS fundamentals and front-end development best practices.

Livestock Data App | .NET MAUI Project| Wintec

Created an app to keep track of the livestock, milk/wool production, profits and more as a project learning the technology through hands-on execution. Integrated a database to hold the data and designed and developed the front-end. Worked collaboratively as a pair demonstrating strong teamwork and communication skills.
